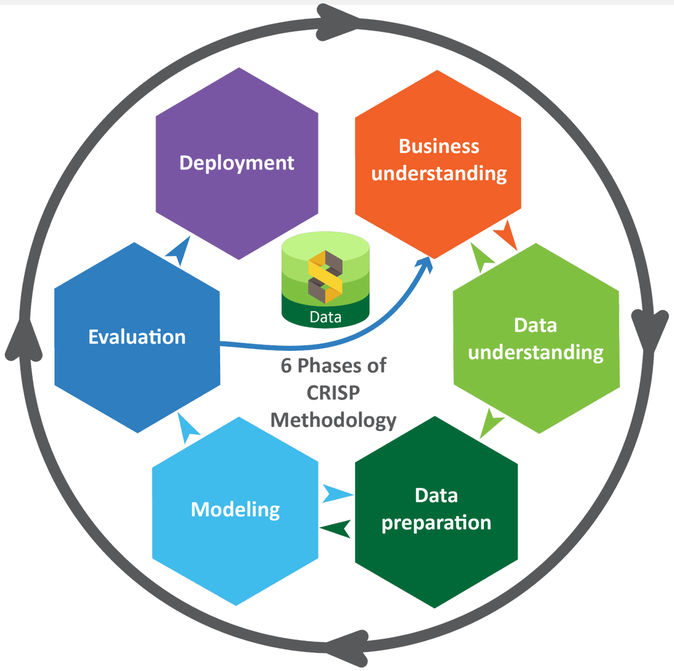
(Machine Learning)



Laboratory 10
Project Specification

Angelica Liguori

Introduction

- Project is about **House Prices Dataset**
  - https://www.kaggle.com/competitions/house-prices-advanced-regression-techniques/data
  - Use only the **train.csv** file

- The goal is to identify the property type
  - The types are:
    - LOW (SalePrice <= 150000)
    - MEDIUM (150000 < SalePrice < 300000)
    - HIGH (SalePrice >= 300000)

Information about the dataset

- Dataset Characteristic: Multivariate
- Number of instances: 1460
- Number of attributes: 81
- Missing value? The dataset could present the value ‘NA’ but it has a meaning → See “dataset description”

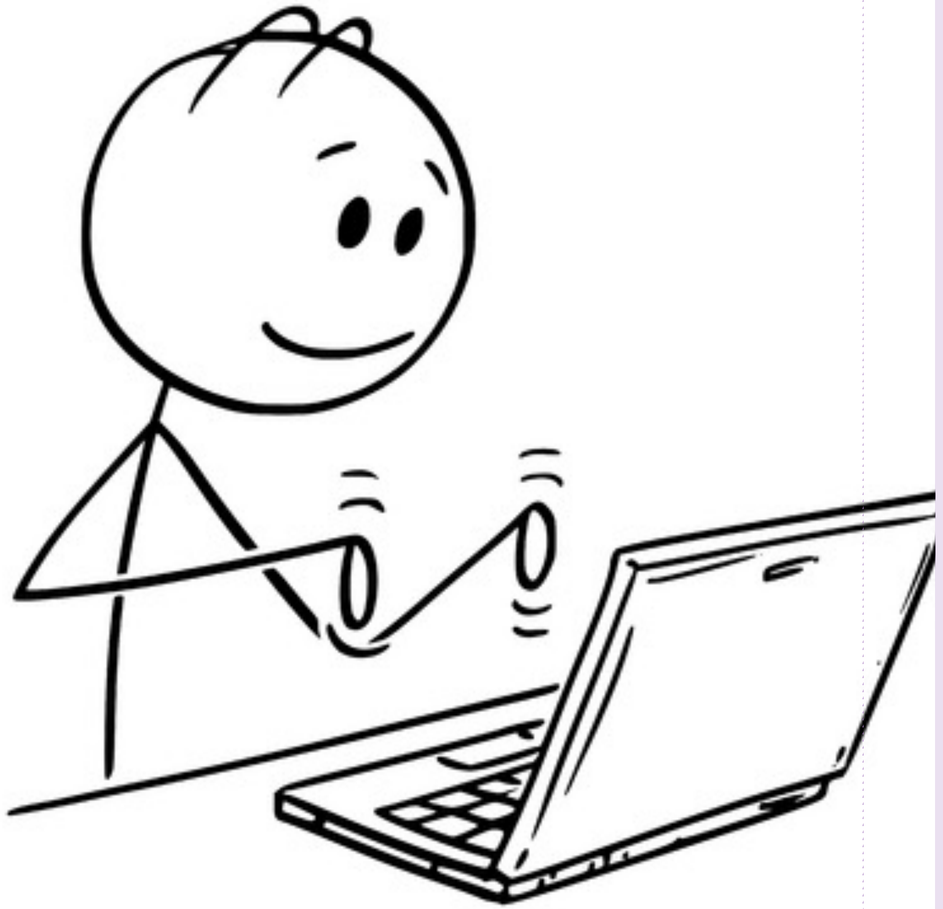
Instructions

- Analyze the dataset applying what you learnt during the course, trying to achieve your goals
  - You can use any kind of analysis tool the best fits your needs

Instructions

- Analyze the dataset applying what you learnt during the course, trying to achieve your goals
  - You can use any kind of analysis tool the best fits your needs

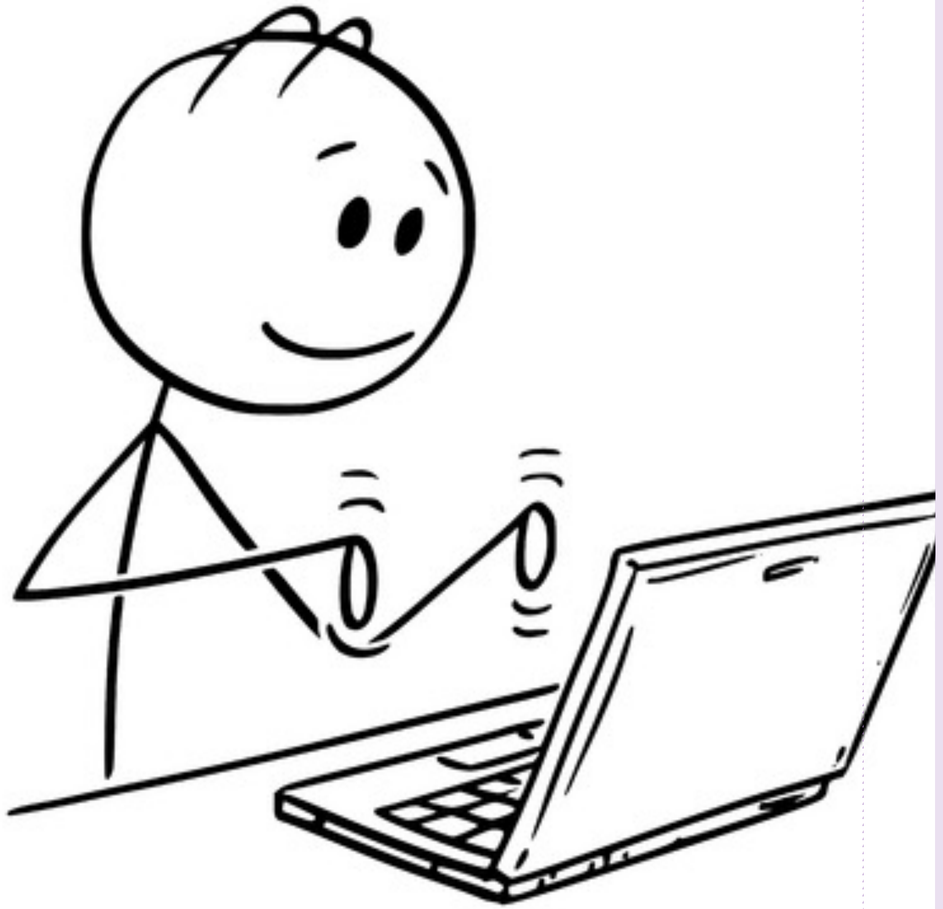
- Produce 2 documents:



Instructions

- Analyze the dataset applying what you learnt during the course, trying to achieve your goals
  - You can use any kind of analysis tool the best fits your needs

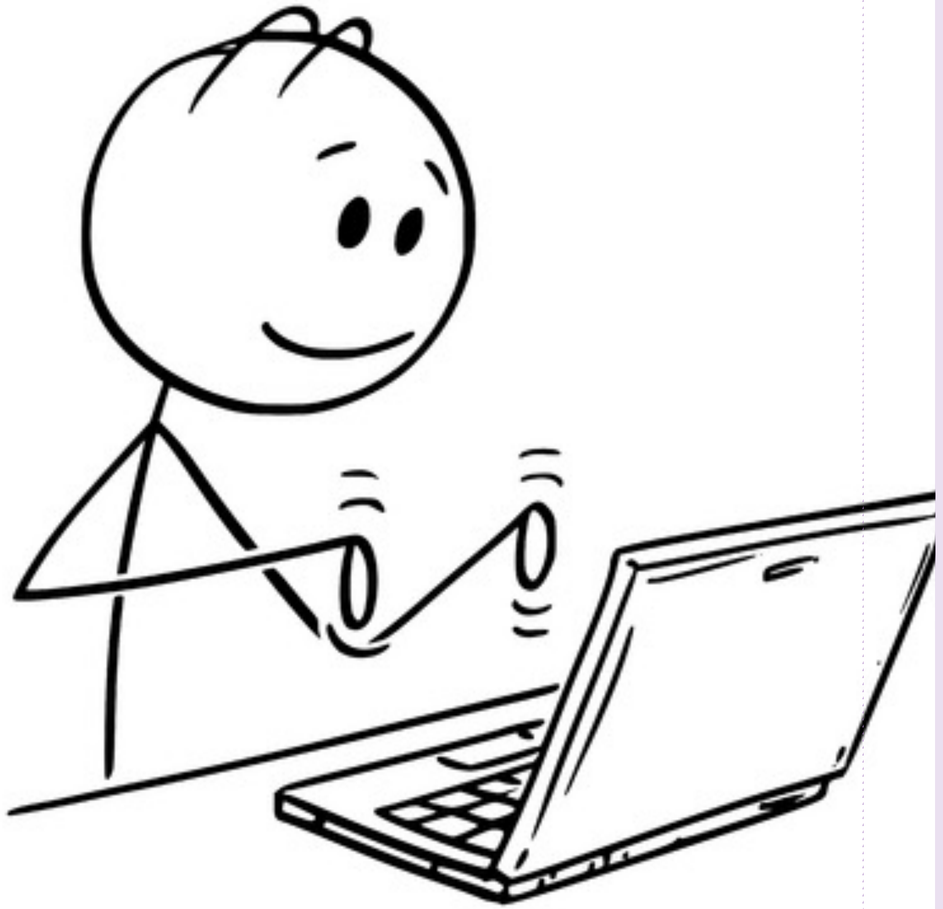
- Produce 2 documents:
  - A **CRISP-DM documentation** (.doc, .docx or .pdf), max 25 pages



Instructions

- Analyze the dataset applying what you learnt during the course, trying to achieve your goals
  - You can use any kind of analysis tool the best fits your needs

- Produce 2 documents:
  - A **CRISP-DM documentation** (.doc, .docx or .pdf), max 25 pages
  - A **Presentation** (.ppt, .pptx or .pdf)



Instructions

- Analyze the dataset applying what you learnt during the course, trying to achieve your goals
  - You can use any kind of analysis tool the best fits your needs

- Produce 2 documents:
  - A **CRISP-DM documentation** (.doc, .docx or .pdf), max 25 pages
  - A **Presentation** (.ppt, .pptx or .pdf)

- The maximum score you can achieve in this phase is 25/30
- If the project will be approved, you will have the oral proof

Decision

Deployment

Plan Deployment
Deployment Plan

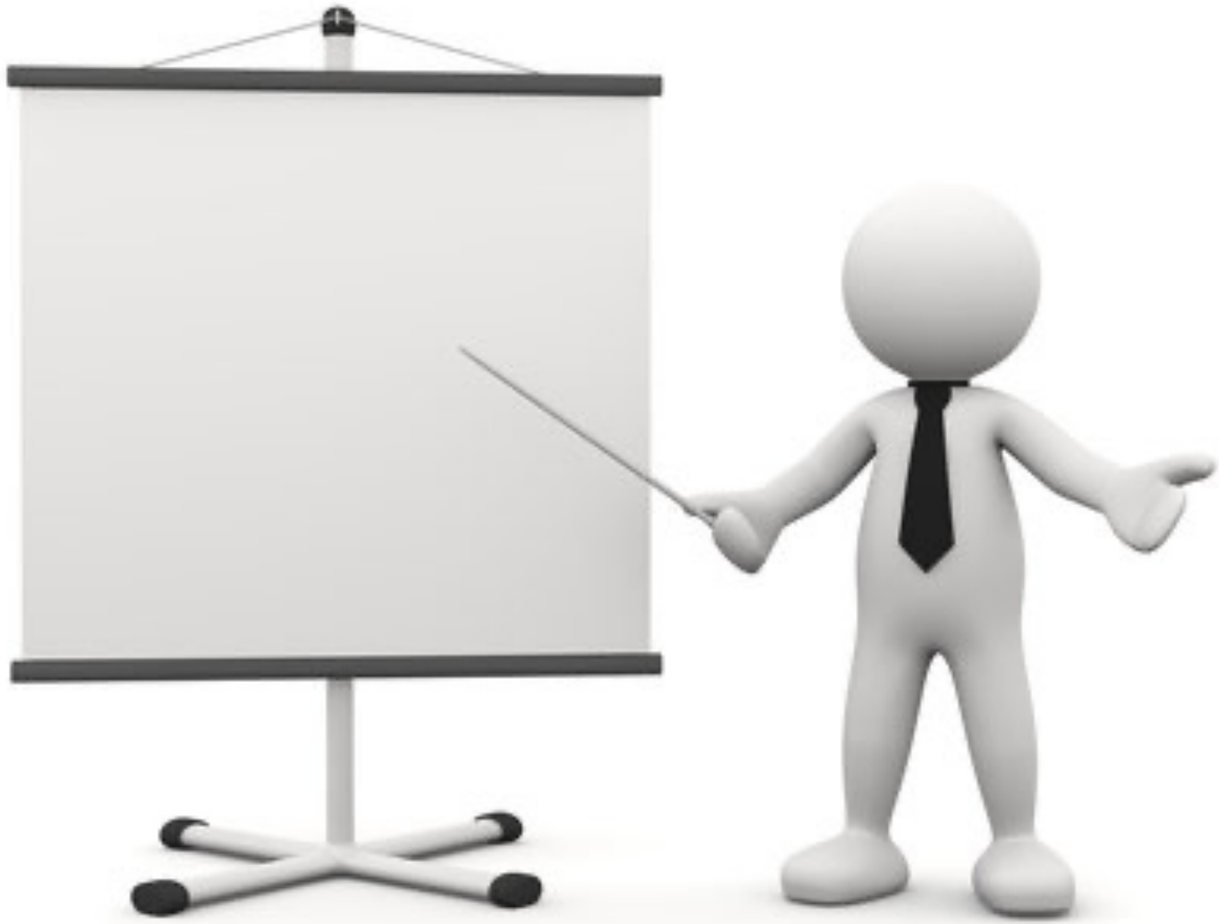
Plan Monitoring & Maintenance
Monitoring and Maintenance Plan

Produce Final Report
Final Report
Final Presentation

Review Project
Experience documentation

Presentation

- The presentation is a summary of what you did during the dataset analysis (**once again you can take inspiration from the CRISP-DM methodology**)
  - Don’t forget any step
- It must last **15** minutes at most
- Focus on your analysis



General Information

- The project will last 1 year
  - You can deliver it whenever you are ready
  - Anyway, 1 week before the exam

- Official notifications will be provided in official exam periods
